How the company has evolved: We began in 1989 as a custom lighting company focusing on chain restaurants and commercial buildings. By 2004 we had expanded to our current location in Orange, CA and greatly increased our in-house fabrication capability. Today our vertically integrated factory incorporates chemical patina finishing, powder coat finishing and state of the art CNC machining, water-jet cutting, 3-D printing and 3-D CAD design.

Known for: We are known for beautiful, artistic and exclusive designs. Our fixtures are highly influenced by History and Architecture and are built with the finest materials and hand craftsmanship. We develop each design to have up to 4 sizes, 6 mounting types, numerous artistic filigrees, patina finishes and glass options.

As we say on our website. “Truly made for you alone”.
